

GASKET

Features

AV GASKET

- AV GASKETS offer Similer sealing performance with 1/3 bolt tightening torque, compared to flat or envelope style gaskets.
- Uniform dimension, fine surface, suitable hardness.
- Long service life.
- Unique Convex Design.

Vitflon-F / FKM-F, Vitflon-C / FKM-C

- Superior in properties of elution of TOC, metal ions and others
- More cost effective than perfluoro-fluorine rubber
- Vitflon-F (for acid resistance)
Effective in nitric, hydrofluoric, hydrochloric and other acid production lines and exhibits significant effects particularly in production lines for nitric hydrofluoric acid and other mixed acids.
- Vitflon-C (for resistance to hydrochloric acid-based chemicals)
Effective against hydrochloric acid-based chemicals and holds far greater chemical resistance than conventional fluorine-based rubber especially in lines where sodium hypochlorite is injected.

IIR-C

- Developed as a gasket for sodium hypochlorite lines.
- Made of high-quality virgin rubber, it is an integrally molded product with no uneven thickness and a smooth surface.
- In it complies with the RoHS2 directive and REACH regulations.

Basic specifications

■ AV Gasket Working Temperature Range

AV Gasket Type	Working Temperature °C [°F]	
AV EPDM Gasket	-40 — 90	{ -40 — 195 }
* AV CSM Gasket	-20 — 80	{ -5 — 175 }
* AV NBR Gasket	-30 — 100	{ -20 — 210 }
* AV IIR-C Gasket	-30 — 90	{ -20 — 195 }
* AV FKM Gasket	-20 — 150	{ -5 — 310 }
AV PTFE COATED Gasket	-40 — 120	{ -40 — 250 }
AV PVDF COATED Gasket	-40 — 120	{ -40 — 250 }

<Use Precautions>

1. Values on the left are general working temperature range.
It may be invasive depending on type, temperature, etc. of chemical solution.
2. Working temperature range for Vitflon-F / FKM-F and Vitflon-C / FKM-C is same as FKM.
3. If insulation is required with EPDM gasket, specify "Insulation EPDM".
4. The marked (*) ones are build-to-order products.

These are cast products so there is no unevenness in thickness and the surface is flat.

The protrusion of dual-layer O-ring prevents leakage even when the surface pressure is low.

Appropriate rubber hardness exerts an buffering effect against heat stress and piping stress.

The material of high-quality virgin rubber extends duration of life.

■ AV Gasket Standard

Standard Type	JIS 5K	JIS 10K	ANSI, DIN
Full Face Gasket	○	○	○
PTFE COATED Gasket	—	○	○
PVDF COATED Gasket	—	○	○

<Use Precautions>

1. When using AV gasket for connecting metal-to-metal flange or resin-to-metal flange, use flat face (FF) metal flange.
Using plane-seat flange (RF) may cause damage to gasket.
2. Some materials are not available for AV gasket depending on standard and type.
For details, please contact our nearest office.
3. IIR-C is available in JIS10K, ANSI, and DIN lineups.
